Family
2015－16 （NFHS－4）on a wide range of topics such as school attendance，reproductive and child health，water and sanitation，nutrition，lifestyle and employment，published
recently by the Ministry of recently by the Ministry of
Health and Family Welfare， Health and Family Welfare，
provide a snapshot of the state of the country＇s health and the state of social progress． Statistics pertaining demographic distribution according to prosperity show that the Scheduled Castes and the Scheduled Tribes continue to be largely impoverished，with 26.6 per cent of the former and a whopping 45.9 per cent of
the latter in the lowest wealth quintile，and only 10.9 per cent of the former and 5.5 per cent of the latter in the highest quintile． Other Backward Classes are evenly distributed among the quintiles，while some 57 per cent of all members of Other Classes are in the top two quintiles．
A survey of household
possessions showed per cent of urban and 87.3 per cent of rural households had at least one mobile phone， testimony to the near－universal penetration of the cell phone． However，barely 20 per cent of urban and less than 6 per cent of rural households had Internet access．Also，less than 30 per cent of all households had at some kind of health insurance The report also contains insightful data on school attendance ratios and the reasons why children are dropping out in urban and rural areas．
More than 60 per cent of the urban and rural male dropouts were due to either high cost among urban and rural girls，lack among urban and rural girls，lac reasons such as being needed for domestic work or getting married were significant．
